

What's Happening...

A school -to-Home Newsletter from the class of Mrs. Molnar

Here are some highlights of the week

March 6-10, 2023

Monday: Students will complete Magazine Monday and answer the essential question, in what ways can advances in science be helpful or harmful? We will subtract fractions of the same whole, with like denominators to solve number stories.

Tuesday: Students will complete the Tune up Tuesday assignment on Wonderopolis. We will discuss the genre of informational text: persuasive articles. Students will discuss why people move to Ohio.

Wednesday: Students Will Write About it Wednesday and review the author's point of view. We will begin a mineral report and share it with the class when finished. Students will subtract mixed numbers by writing equations, drawing diagrams, and solving number stories.

Thursday: Students will complete Think Outside the Box Thursday and share their work. We will complete a Social Studies Stretcher and use Google Earth to complete a landform booklet. Students will record data on a line plot.

Friday: Students will take a comprehension and vocabulary test and practice solving line plots. We will read about disputes over land in Ohio.
